ZYXEL Digiweb *Quick Start Guide*

Using your Telephone with Zyxel

Connect your telephone to the “Phone 1” port on the back of the Zyxel to start using your VoIP telephone service. The VoIP “Phone Light” circled below will be steady green when Digiweb Broadband Talk VoIP is active.

What is Digiweb Broadband Talk (VoIP)?

Voice over Internet Protocol (VoIP) is a technology that allows you to make telephone calls using Digiweb’s broadband connection instead of your traditional phone line.
The main benefits of Digiweb VoIP are that it significantly reduces costs by eliminating line rental charges associated with a traditional landline service and it is also a more efficient method of making & receiving calls
