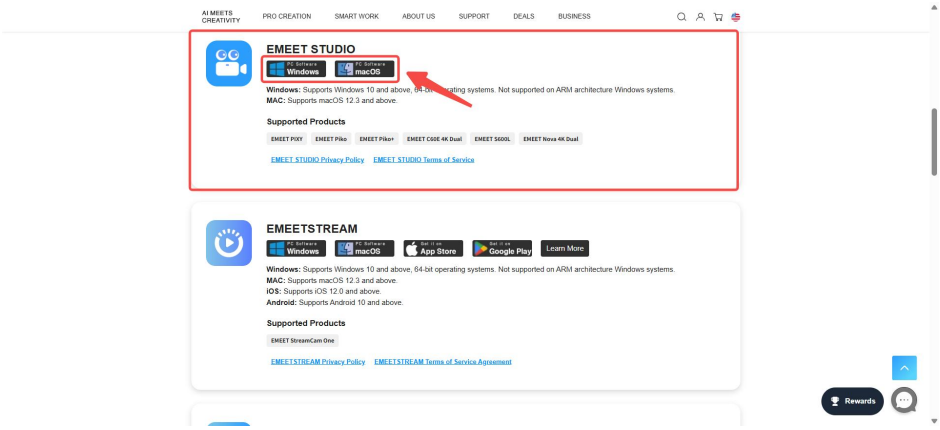
S600L Ring Light Adjustment Guide

Physical Button Control

1. Short press the control button to turn on the ring light. Short press again to switch light colors: Cool White, Warm Yellow, Mixed Light, and **Ambient Light (default blue; more colors available via EMEET STUDIO).**
2. Long press the button for 2 seconds to turn off the ring light.
3. Rotate the button to adjust brightness freely.

Software Control

1. Go to the EMEET official website download page （https://emeet.com/pages/software-service-downloads）Download and install **EMEET STUDIO**.



2. Connect your S600L to your computer, launch EMEET STUDIO, enter the Assistant interface, and scroll down to find fill light settings.

3. In this settings area, you can freely adjust the color and brightness of the fill light. In addition to the basic light effects of cool white light (Cool), warm yellow light (Warm), and mixed light (Mixed), you can also customize the ambient light color. There are 7 options for ambient light: Clear Blue, Soft Purple, Retro Orange, Fresh Cyan, Sweet Pink, Bright Yellow, and **Rainbow Light Effect.**
