Today, Webcam Hacking happens frequently throughout the world

Increasing number of people are threatened by invasion of privacy

People around the world now live in fear of webcam hacking

Someone could be watching you through your webcam, without you even realizing. It is now possible to control and spy through your webcam without activating the indicator light. Webcam hacking is directly related to privacy exposure and it is hard to be relieved from the anxiety.

The seriousness of the problem became very obvious after various press releasing articles about Facebook CEO, Mark Zuckerberg, and FBI Director using stickers/tapes to physically cover their webcam.

STEAGLE webcam cover can solve the problem

STEAGLE designs and manufactures refined computer accessories to support the security measures of 3.5 billion internet users

STEAGLE webcam cover protects you from webcam hacking and keep your computer safe and secure

Aluminum is used to make STEAGLE, allowing it to be as thin as your credit card but still strong and solid

It is very thin and slim due to its sophisticated design techniques and it won't affect the thickness of your laptop when it is closed

It is very smooth to open and close because we used advanced CNC* machine during the production

We proudly introduce STEAGLE webcam cover

STEAGLE applied and obtained international patent as well as design and trademark rights for our products

Original & Mini : Black, Silver

Black is often the color associated with elegance and formality

Special Edition : apple, DON'T TOUCH MY LAPTOP

Witty quotes are printed to express your personality

Flag Edition : USA, CANADA, UK

Flag Edition is a series of various national flags

*We also have newly released products with Marvel characters(Collaboration with Disney Korea and ownership of Disney Korea license)

For any item, customization and collaboration are available for bulk orders

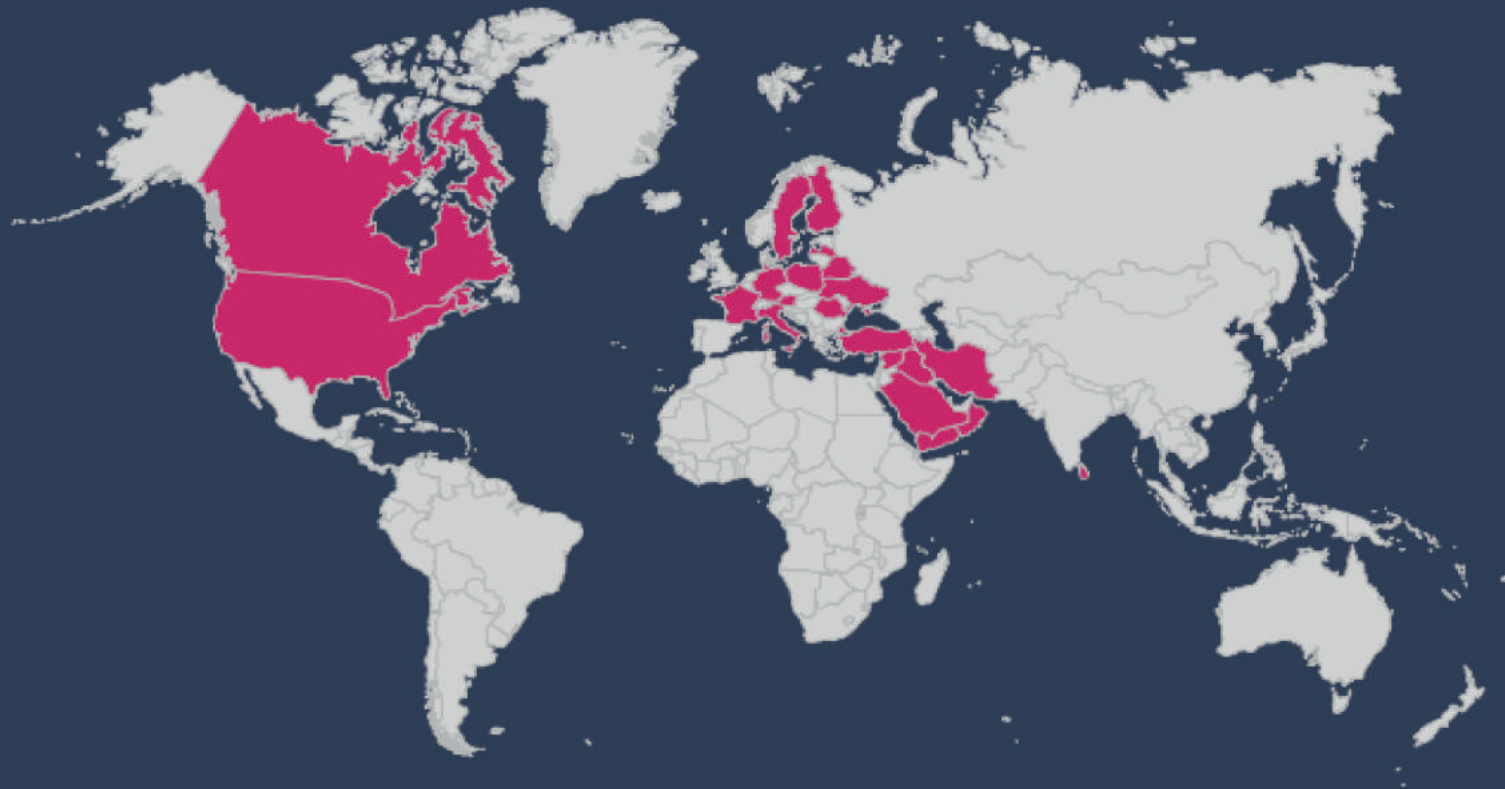

We can make an unique design only for you and your special people
